

## Testosterone Replacement Therapy (TRT) Pathway

## What is Testosterone Replacement Therapy?

TRT is a medical treatment used to restore testosterone levels in men with clinically confirmed testosterone deficiency (male hypogonadism), diagnosed based on symptoms and blood test results.

**TRT can be prescribed in two forms:**

- **Intramuscular or subcutaneous injections**
- **Topical gels**

**Possible benefits from TRT:**

- **Improved energy levels**
- **Increased libido**
- **Improved mood**
- **Increased muscle mass**
- **Reduced fat mass**
- **Improved bone density**
- **Improved concentration**
